Education

2016-2020 (Graduated)

Games and Interactive Media Design

Bachelor of Arts

U-Tad Madrid

2014-2015 (Not Graduated)

Advertising / PR / Marketing

Bachelor of Arts

ESIC Madrid

Jorge León Elías

Game Designer

Technical & Systems Game Designer specializing in Unreal Engine and gameplay systems.

Credits:

Endling: Extinction is Forever (BAFTA Winner, Herobeat Studios)

Wilderings: The Lost Spring (Herobeat Studios)

Project Survive (CI Games)

Lords of the Fallen II (CI Games)

Core Skills:

Systems Design • Technical Design • Gameplay Prototyping • Unreal Engine 5 • Blueprints • AI & Gameplay • Combat Design • Progression • Gameplay Ability System

Experience

09/2023 - Present

CI Games

Technical Designer 02/25 - Present

- Design, prototyping and iteration of gameplay features from concept to implementation.
- Systems design across gameplay, AI, progression and player experience.
- Cross-disciplinary collaboration to turn design requirements into robust, playable features.
- Debugging, iteration and technical support across gameplay systems.
- Developed project: **Lords of the Fallen II** (Unreal Engine 5).

Systems Designer 09/23 - 02/25

- Systems design and implementation for an unannounced first-person survival project.
- Designed and prototyped core gameplay systems, progression and player onboarding.
- Worked across AI, combat, quests and feature progression during early development.
- Built and iterated gameplay prototypes directly in Unreal Engine 5 using Blueprints.
- Collaborated with design and other disciplines to establish the game's early playable experience.

08/2021- 09/2023

Herobeat Studios

Principal Game Designer 07/2022 - 09/2023

- Led game design during the early development of Rewilders: The Lost Spring.
- Defined core gameplay loops, progression, combat and overall game structure.
- Designed and prototyped gameplay systems in close collaboration with creative direction.
- Designed and implemented AI, combat behaviours and traversal systems.
- Worked across level design and rapid prototyping to validate mechanics and player experience.
- Developed project: **Wilderings: The Lost Spring** (Unreal Engine 5).

Technical Game Designer 08/2021 - 07/2022

- Designed and implemented gameplay systems, events and side-quest content.
- Worked on cinematic design and bespoke camera sequences supporting the game's visual storytelling.
- Balanced survival systems, resources, enemy encounters and player progression.
- Designed and implemented AI behaviors and gameplay logic in Unreal Engine.
- Iterated on UX and gameplay features throughout development, including post-launch support.
- Developed project: **Endling Extinction is Forever** (Unreal Engine 4) **BAFTA** winner.

06/2021 - 08/2021

5th Element Gaming

Game Programmer

- Implemented gameplay mechanics and interactive systems in Unity.
- Developed tools and systems supporting rapid gameplay iteration.
- Implemented progression and in-game systems.
- Worked on Google Play Services integration.
- Optimized gameplay code and supported the development of multiple projects.
- Developed projects: **Pencilmation Arkanoid** (Unity).
